1. Aryan Sharma:

- Solid experience in Python Django development, with demonstrated expertise in building backend applications and integrating frontend interfaces.
- Recognized for outstanding performance and awarded for problem-solving skills and enthusiasm for exploring new technologies.
- Strong focus on continuous integration and deployment, showcasing proficiency in agile methodologies and AWS deployment.
- Bachelor's degree in Computer Science and Engineering, along with a Blockchain Developer certification, further validate technical competence.

2. Anvi Gupta:

- Extensive 8.7 years of experience in web and mobile application development, showcasing versatility across Angular, Node JS, and Ionic Framework.
- Proven track record of delivering complex projects like online banking and railway planning dashboards, highlighting adaptability and problem-solving skills.
- Strong educational background with a bachelor's degree in Technology, ensuring a solid foundation in computer science principles.
- Diverse skill set covering a wide range of technologies, making Anvi well-equipped to handle various development challenges.

3. Archar Kumar:

- 6 years of comprehensive experience in web development, with proficiency in PHP (CakePHP, Laravel, CodeIgniter), React JS, and Node JS.
- Extensive project portfolio spanning ERP systems, booking applications, and educational software, demonstrating versatility and adaptability.
- Master's degree in Computer Application further solidifies technical expertise and understanding of software development principles.
- Strong problem-solving and decision-making abilities, coupled with leadership experience, make Archar an asset for any development team.
